

Welcome to Dibber International School Helsingborg, where every student is given the opportunity to grow to their fullest potential. At DISH, we strive to ensure that each student knows that they are valuable and unique.

My name is Anna Fondell Persson, and I am the principal at Dibber International School Helsingborg. My education began as a primary years teacher, grades 1-7, and then I continued my education with Montessori teacher training, IB trainings as well as the Swedish National Principal's Education. My background as an educator, administrator and deputy superintendent of schools has influenced my view of education and how children learn greatly.

As a person I am innovative, decisive, and positive. In my roll as a principal, I work to develop a school environment that is modern and accessible for all students to reach their potential through developing a thirst for learning that they can carry with them throughout their lives. I wish that all students can be free to express their curiosity and enthusiasm for life through fostering their natural curiosity.

My work as an educator focuses on the belief that we have an incredibly important task to ensure that the world's most precious resources, our children, can grow and thrive. I believe that creating an environment where students' feel safe and welcome is the foundation of all learning. Students who feel safe and secure are able to learn more, which results for higher student outcomes. All parents/guardians should also feel secure as they leave their most precious

resource with us at DISH and know that we are creating a safe and stimulating learning environment where students can become the best version of themselves.

Communication and feedback are important areas of focus for me as well as fostering and maintaining a positive climate for students and staff. My leadership style focuses on creating a dialogue so that students and staff grow and develop through their time at DISH. Through a trusting and caring environment with clear goals we are able to achieve excellent results.

I look forward to continuing my journey at Dibber International School Helsingborg to provide students with the opportunity for a global future. DISH is a school that lays the foundation for life-long learning with an emphasis on both the academics, but also the arts where modern technology and bilingualism stimulates students to develop all aspects of themselves. IB is a pedagogical framework that exists in over 150 countries. IB combines pedagogical approach combines perfectly with the Swedish compulsory curriculum, Lgr11. The backbone of the IB programmes is to develop competent world citizens through challenging students to work collaboratively to see the interconnectedness in the world and its people and find meaning in both the local, but also global community we live. We hope that through IB's pedagogical framework we are able to instil values that they can take with them throughout their lives as they continue to grow and develop.
